Dear Valued Customers:

Section 1502 of the Dodd-Frank Act of 2010 requires all publicly traded companies disclose and report their use of "Conflict Minerals." Generally, Conflict Minerals collectively refer to cassiterite, columbite-tantalite, gold, wolframite, or their derivatives, including tantalum, tin and tungsten, which originate from the Democratic Republic of the Congo (DRC) or certain adjoining countries.

M. Glosser & Sons, Inc. is not subject to the Conflict Materials rules and reporting requirement because the company is privately owned and is not subject to SEC regulation. However, we understand that our customers may be subject to these rules. We also share the concerns of many regarding the profits from mining these conflict minerals that may be aiding human rights abuses.

In order to determine if the products we sell contain Conflict Minerals, we have conducted a survey of our suppliers to ascertain their use of any Conflict Minerals in the products they supply to us. As we are a distributor and not a producing mill, we rely on the statements of our suppliers. The results of the survey demonstrate that, based upon our reasonable and good faith inquiry, our suppliers do not use any of these minerals as additives in any of their processes. Therefore, to the best of our knowledge, none of the products we sell contain any Conflict Minerals.

Thank you for the opportunity to be your supplier. We appreciate your business.

Sincerely,

M. Glosser & Sons, Inc.
